## CS 441 Assignment 2

1)

2)

Use Case Name	Account Transfer
Goal	Transfer money from the user's checking account to saving account.
Primary Actor	Customer
Preconditions	Customer should have money in checking account.
Guarantee(Postconditions)	Money will successfully be transferred from checking account to savings account. Current balance will be updated.
Main Success Scenario	<ol style="list-style-type: none"><li>1. Customer logs into account</li><li>2. Customer selects an account to transfer from</li><li>3. Customer selects transfer</li><li>4. Customer enters the amount of money to be transferred</li><li>5. System Admin checks to see if sufficient funds are available for transfer</li><li>6. System Admin approves transfer request</li><li>7. Funds are then moved to the desired account</li></ol>
Extensions	<p>1a: Login fails 1a1: Must reenter user credentials</p> <p>5a: Insufficient funds 5a1: System Admin prints error along with current account balance and requests new amount to be transferred</p>
